

NOTA Special Event

Here is another On The Air Special Event that you can get your HF as well as 2 meter and 70 cm rigs warmed up for. The National Aeronautics and Space Administration (NASA) is beginning their year long NASA On The Air Special Event beginning December 11, 2017 and will run through December 2018. There will be at least 14 stations operating across the U.S., including the International Space Station (ISS). The On The Air Special Events have been well received and no doubt the NASA event will be well received as well.

Details, rules and other related information can be found at the NASA Special Event web page:
